Dariusz Pilecki

Web Developer

Hi! My name is Dariusz and I'm passionate about programming. I love learning new technologies, and continuous development of my skills is my priority. I have made several individual commercial projects and currently dreaming about becoming a part of a good team that will let me spread my wings.

Technologies

HTML5 CSS3 SCSS Bootstrap JavaScript

GSAP React Redux Vue TypeScript

Node.js Express Nest TypeORM MongoDB

mySql Jest Git NginX PM2

Webpack Websocket

Education

2009 - 2014

AGH Kraków

Environmental engineering: specialization RES

degree:

Bachelor of Engineering

Current Job

2015 - today

Techglass

Combustion Engineer

Clause

I hereby consent to my personal data being processed for the purpose of considering my application.

Projects

Application Head Hunter

Stack: React, Nest, TypeScript, TypeORM, mySql

Application created as part of the internship at the end of the one-year MegaK programming course. Working in an 8-person team in the Scrum/Agile methodology, in which I was selected as the leader of the back-end part.

(Back-end Repository)   (Front-end Repository)

Application Tool base

Stack: React, Express, TypeScript, TypeORM, mySql, Jest

A commercially made workshop tool management program. I was able to create a smooth running front-end and back-end applications connected to the database, having a simple, responsive interface. I wrote the back-end using TDD.

(Back-end Repository)   (Front-end Repository)

Device Dry Ager

Stack: React, Express, Websocket, Python

Device control based on the Websocket and Experss servers. Controls by scripts written in Python run as JS child process The program controls heating, cooling, drying, humidifying and a built-in camera with backlight.

(Back-end Repository)   (Front-end Repository)

Service GSSCH

Stack: Express, JavaScript, MongoDB

Website made for a commercial cooperative, with a content management system, archiving and a cloud for documents. This app is a SPA website made in pure JS. It is possible adding users with different authorization levels.

(Repository)

IT education

Vue - The Complete Guide (incl. Router and Composition API)
30 hours Stack: Vue.js

MegaKurs
14 months Stack: JavaScript ES6+, Node, Express, React, Nest, TypeScript, Jest, mySql, noSql

Advanced front-end projects
50 hours Stack: SASS, GSAP, Canvas, SVG, CSS, Webpack, Bootstrap

Python: Basics
25 hours Stack: Python 3

Basics of Back-endu with node.js
40 hours Stack: Node, Express, Jest

React for begginers
60 hours Stack: React

Basics of programming in JavaScript
40 hours Stack: JavaScript ES6+

Front-end for intermediate
15 days Stack: CSS3, SASS, HTML5, JavaScript

Web-developer: beginning
15 days Stack: HTML5, CSS3
